

Price, Price, Price

By Megan Piphus

Sell your supply

Right on time

When you price just right

Verse 1

When the whole world demands

The cheese that you sell

You can't price too cheap

You'll run out in a sweep

If your price is too low

You will have a shortage

When the whole world demands

The cheese that you sell

You can't price too high

Tell your buyers goodbye

If your price is too high

You will have a surplus

Chorus

Price, price, price

Can't price too nice

Price, price, price

Just right

When your price

Is priced just right

Demand matches

Supply

When demand matches supply

The market is in equilibrium

Equilibrium

Equilibrium!

Bridge (call and response with rats)

If ya' price too low (if ya' price too low)

Than you'll sell too fast (than you'll sell too fast)

If ya' price too high (if ya; price too high)

Than you'll sell too slow (than you'll sell too slow)

x2

Scarcity Cat ad lib at end

Price just right
